Quality

We have a team of highly reliable, responsible, hardworking and multi-skilled people with many years of shipping experience. This team and our well-equipped workshop are making SupTech Construction a company which offers the best solutions and excellent ship care services to ship owners. All works are performed according to the rules and standards of all major International Classification Societies and National Maritime Authorities. We value the latest technology, innovation, superior quality, best price, careful planning, punctual delivery time and priority to safety. This all is resulting in having satisfied clients and being a dynamic player in ship repair fields.

Repair

For us repair means rebuilding. Every vessel brought to our site is treated with first class service and the most advanced technology. The whole vessel is methodically reviewed from bow to stern and we concentrate on every single detail. Whatever the problem, we are always ready for you and the vessel. It's a lot more than repairing, it's rebuilding. It's about our years of experience, it's about earning your trust!

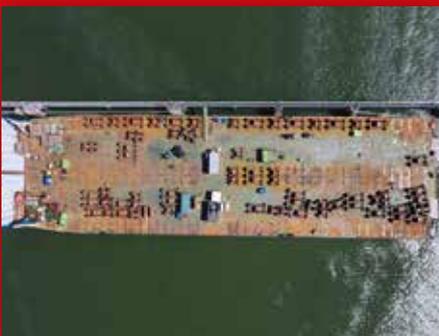

Vision and mission

Our vision is to become the best construction, ship repair and maintenance shipyard in our region. Becoming the best, but with ultimate attention paid to quality and safety and with great respect to the environment while exceeding our customers' needs. Our mission is to work hard and efficiently within strict time limits and with respect for quality and safety within the holdings corporate culture in order to reach our vision.

Sustainability

- Charging points electrical equipment
- Shore power facilities, largely generated by our own solar panels
- Making existing buildings more sustainable
- Energy-neutral new construction
- One stop shop, saves traveling unnecessary distances with ships, people and equipment
